Svar på samme opgave igen i hold med den du sidder ved siden af.

Opg\Svar	1	2	3
1	73,3	25,5	1,2
2	90,1	9,3	0,6
3	83,9	15,5	0,6

Operator	Associativity	Description
+<expr>, -<expr>, ~~~<expr>	Left	Unary identity, negation, and bitwise negation operator
f <expr>	Left	Function application
<expr> ** <expr>	Right	Exponent
<expr> * <expr>, <expr> / <expr>, <expr> % <expr>	Left	Multiplication, division and remainder
<expr> + <expr>, <expr> - <expr>	Left	Addition and subtraction binary operators
<expr> ^^^ <expr>	Right	bitwise exclusive or
<expr> < <expr>, <expr> <= <expr>, <expr> > <expr>, <expr> >= <expr>, <expr> = <expr>, <expr> <> <expr>, <expr> <<< <expr>, <expr> >>> <expr>, <expr> &&& <expr>, <expr> <expr> ,	Left	Comparison operators, bitwise shift, and bitwise 'and' and 'or'.
<expr> && <expr>	Left	Boolean and
<expr> <expr>	Left	Boolean or

Funktioner

Leksikografisk virkefelt

Organisering = nemmere at forstå og vedligeholde

```
let greetings (name : string) : string =  
  "Hello " + name
```

Indryk angiver funktionskroppen

```
let str = greetings "Jon"  
printfn "%A" str  
printfn "%A" (greetings "World")
```

```
> let greetings (name : string) : string =  
  - "Hello " + name;;  
val greetings : name:string -> string
```

```
let greetings name =  
  "Hello " + name
```

```
let greetings name = "Hello " + name
```

```
let greetings name : string = "Hello " + name
```

```
let greetings (name : string) = "Hello " + name
```

Decimal til Binær: Divider med 2

```
let rec divideByTwo (n: uint) : string =
    match n with
    | 0u -> ""
    | _ -> (divideByTwo (n/2u)) + (string (n%2u))
```

```
let N = 11u
let str = divideByTwo N
printfn "%A_10 = %A_2" N str
```

```
let divideByTwo (n : uint) : string =
    let mutable i = n
    let mutable str = ""
    while i > 0u do
        str <- string (i % 2u) + str
        i <- i / 2u
    str
```

```
let N = 11u
let str = divideByTwo N
printfn "%A_10 = %A_2" N str
```

Canvas: tegn en cirkel med rette linjestykker

$$p(a) = (r \cos a, r \sin a)$$

Canvas: tegn en cirkel med rette linjestykker

```
draw.fsx
Users > jrh630 > repositories > PoP > lectures > 02GettingStarted > src > draw.fsx
1  #r "nuget:diku.canvas, 1.0.1"
2  open Canvas
3
4  let circ (C: canvas) (col: color) (r: float) (x: float) (y: float) (n: int) : unit =
5      let rec arc (da: float) (i: int) : unit =
6          match i with
7              | 0 -> ()
8              | _ ->
9                  let a = da*float i
10                 let b = da*float (1+i)
11                 let x1 = int (x+r*cos a)
12                 let y1 = int (y+r*sin a)
13                 let x2 = int (x+r*cos b)
14                 let y2 = int (y+r*sin b)
15                 setLine C col (x1,y1) (x2,y2)
16                 arc da (i-1)
17         arc (2.0*System.Math.PI/float n) n
18
19 let w = 800
20 let h = w
21 let C = create w h
22 let half = (float w)/2.0
23 let quarter = (float w)*3.0/8.0
24 circ C black quarter half half 36
25 show C "Circle"
26
```

main* 0 0 0 Ln 26, Col 1 Spaces: 2 UTF-8 LF F#

Canvas: tegn en interaktiv cirkel

Interactive Canvas

```
val runApp      : string -> int -> int
    -> (int -> int -> 's -> canvas)
    -> ('s -> key -> 's option)
    -> 's -> unit
```

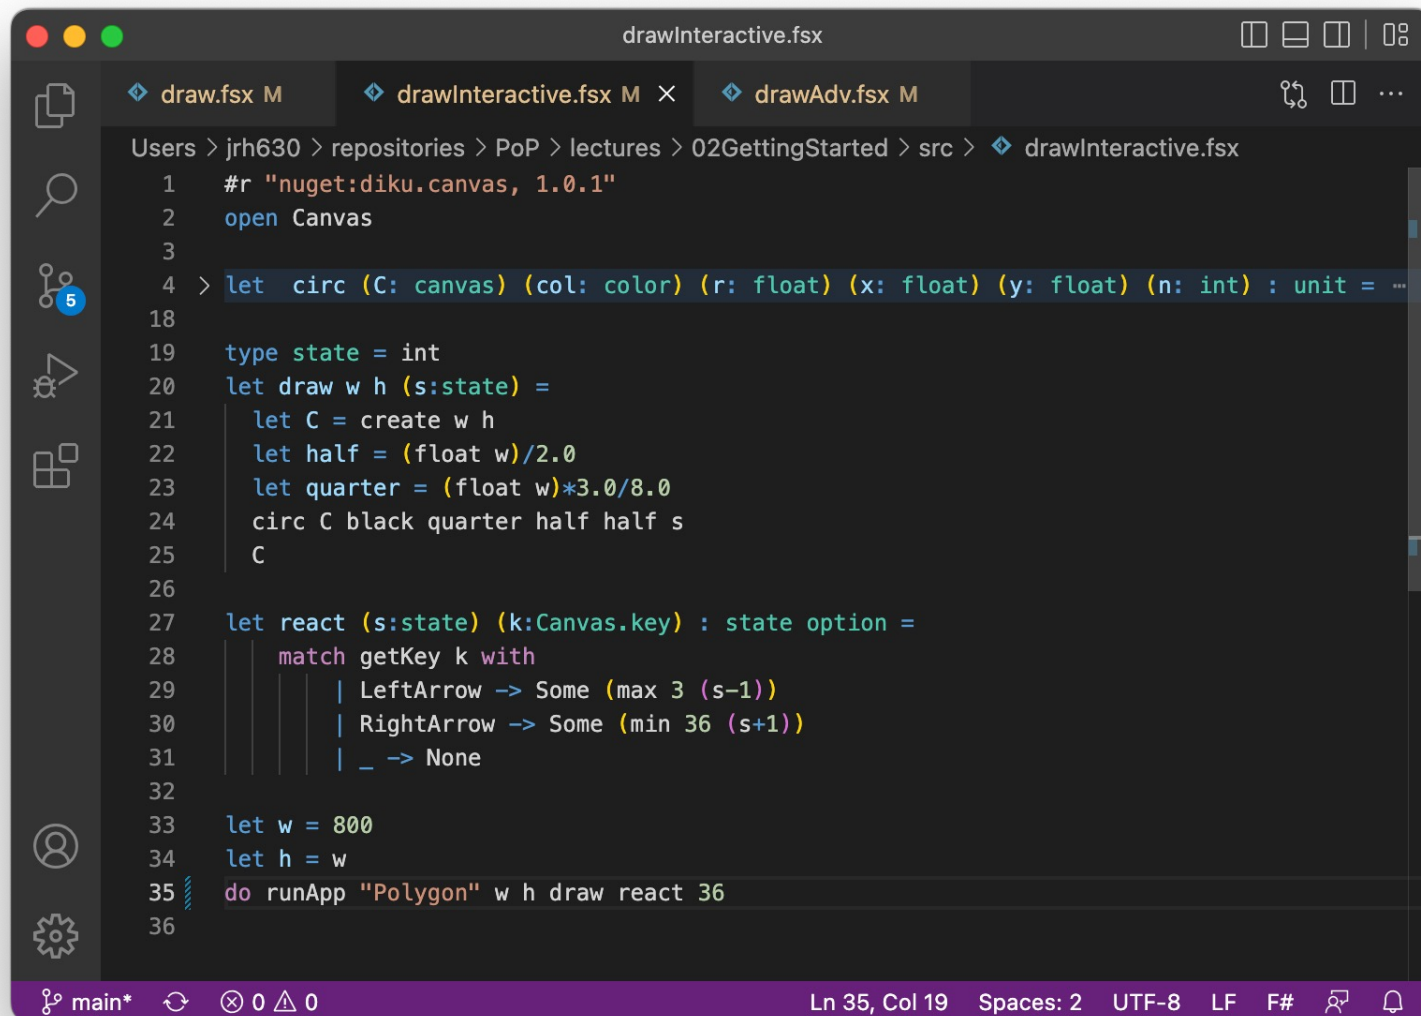

Eksempel

```
type state = int
let draw (w: int) (h: int) (s: state) = ...
let react (s: state) (k: Canvas.key) = ...
do runApp "Text" 300 300 draw react 0
```

Hvad gør runApp?

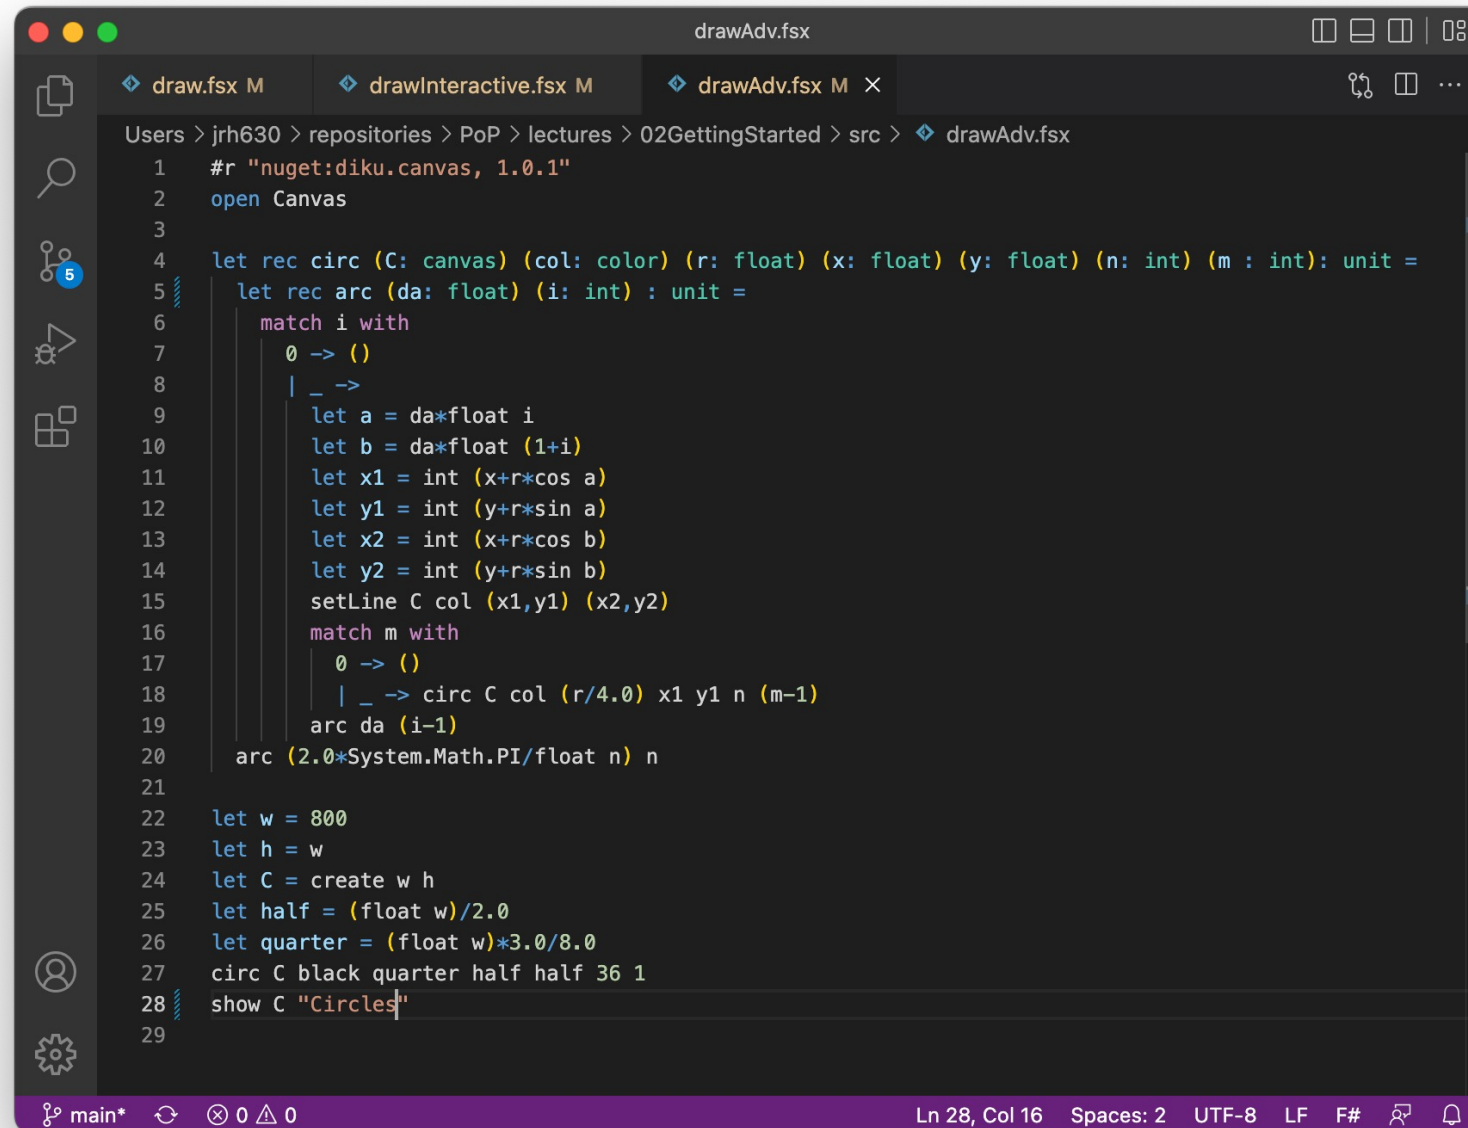

```
let runApp txt w h draw react init =
    let mutable s = init
    draw w h s

    while true do
        let k = userKeyPress ()
        s <- react s k
        draw w h s
```

```
drawInteractive.fsx
Users > jrh630 > repositories > PoP > lectures > 02GettingStarted > src > drawInteractive.fsx
1  #r "nuget:diku.canvas, 1.0.1"
2  open Canvas
3
4  > let circ (C: canvas) (col: color) (r: float) (x: float) (y: float) (n: int) : unit = ...
18
19  type state = int
20  let draw w h (s:state) =
21      let C = create w h
22      let half = (float w)/2.0
23      let quarter = (float w)*3.0/8.0
24      circ C black quarter half half s
25      C
26
27  let react (s:state) (k:Canvas.key) : state option =
28      match getKey k with
29      | LeftArrow -> Some (max 3 (s-1))
30      | RightArrow -> Some (min 36 (s+1))
31      | _ -> None
32
33  let w = 800
34  let h = w
35  do runApp "Polygon" w h draw react 36
36
```

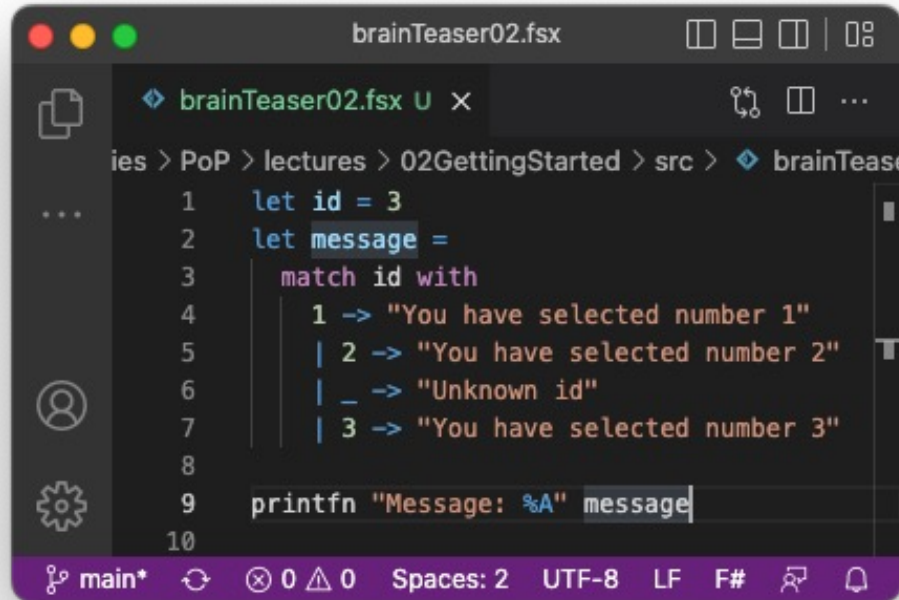

Canvas: tegn en cirkel rekursivt

```
drawAdv.fsx
Users > jrh630 > repositories > PoP > lectures > 02GettingStarted > src > drawAdv.fsx
1  #r "nuget:diku.canvas, 1.0.1"
2  open Canvas
3
4  let rec circ (C: canvas) (col: color) (r: float) (x: float) (y: float) (n: int) (m : int): unit =
5      let rec arc (da: float) (i: int) : unit =
6          match i with
7          | 0 -> ()
8          | _ ->
9              let a = da*float i
10             let b = da*float (1+i)
11             let x1 = int (x+r*cos a)
12             let y1 = int (y+r*sin a)
13             let x2 = int (x+r*cos b)
14             let y2 = int (y+r*sin b)
15             setLine C col (x1,y1) (x2,y2)
16             match m with
17             | 0 -> ()
18             | _ -> circ C col (r/4.0) x1 y1 n (m-1)
19             arc da (i-1)
20     arc (2.0*System.Math.PI/float n) n
21
22 let w = 800
23 let h = w
24 let C = create w h
25 let half = (float w)/2.0
26 let quarter = (float w)*3.0/8.0
27 circ C black quarter half half 36 1
28 show C "Circles"
29
```

main* 0 0 0 Ln 28, Col 16 Spaces: 2 UTF-8 LF F#

Hvad skriver programmet

```
1 let id = 3
2 let message =
3     match id with
4     | 1 -> "You have selected number 1"
5     | 2 -> "You have selected number 2"
6     | _ -> "Unknown id"
7     | 3 -> "You have selected number 3"
8
9 printfn "Message: %A" message
10
```

- ☐ "You have selected number 2"
- ☐ "You have selected number 1"
- ☐ "You have selected number 3"
- ☐ "Unknown id"
- ☐ Andet

```
% dotnet fsi brainTeaser02.fsx
/Users/jrh630/repositories/PoP/lectures/02GettingStarted/src/brainTeaser02.fsx(7,7): warning
FS0026: This rule will never be matched
```

```
Message: "Unknown id"
```

Resumé

I dag har vi talt om:

- Funktioner
- Dividér med 2 algoritmen på funktionel og imperativ form
- Canvas cirkeltegning og interaktion
